Energizer Announces Settlement With Wahl Clipper Corporation

08/21/12

ST. LOUIS, Aug. 21, 2012 /PRNewswire/ -- Energizer Holdings, Inc. announced today that it has settled a patent infringement suit against the Wahl Clipper Corporation. Filed in the U.S. District Court for the Northern District of Illinois on April 11, 2012, the suit charged that primary lithium batteries supplied by Great Power Battery (H.K.) Co., Ltd. and packaged in various Wahl products infringed five different Energizer patents. As part of the settlement, Wahl will cease all future infringing activities. In addition, Energizer and Wahl will now partner to recommend and include Energizer primary lithium batteries in future product offerings by Wahl.

Energizer has long been a leader in battery innovations, as evidenced by its invention of the AA lithium battery over twenty years ago and its introduction of the world's first AAA lithium battery in 2004. Recently, Energizer retooled the materials and construction of its AA Ultimate Lithium batteries to further improve upon its industry-leading capabilities, and Energizer lithium batteries are recommended for use in a wide variety of high-tech devices, including those manufactured by Nikon, Garmin, Magellan, SPOT, Bushnell, RCA and Wahl.
